Bruce Ferrell, managing editor of WPTF News and the NC News Network, joins host Barlow Herget to review the news such as the political impact of Governor Perdue's veto of the abortion bill approved by the Republican-controlled legislature. What's left for the Governor to sign, veto or not sign but allow to become law? Ferrell and Herget also look at why Bank of America stock went UP after the bank's announcement it would pay \$8.5 billion to 22 large investors because of the bank's mortgage loan practices. And the US Supreme Court declared illegal an Arizona program to finance political campaigns, a decision that has implications for NC's public financing of election campaigns for the state's appellate judges.
